# Workshop Sessions at Members' Day 2017

Whether you're on the health & safety side, your company's technical guru, leading the company growth plan, or looking for the latest innovations, we have the workshops for you. Our range of workshops will suit you and others in your business and you can select one workshop to attend from each row below in addition to the main sessions.

Time	Programme for 15th June 2017
08:15-09:00	<b>Delegate Registration and Exhibition</b> Once registered, visit the free exhibition, showcasing the latest innovations and technologies to aid the joinery industry
09:10-09:40	<b>Keynote Address: Making the Most of Wood</b> <i>Dr Tom Woolley, Rachel Bevan Architects</i> The impact of building materials and construction methods on sustainability and the health and wellbeing of occupants has never been subject to closer scrutiny. This presentation from renowned architect, author and academic Tom Woolley leads us through the confusing landscape of health, sustainability and the huge opportunities for timber products when we start to look at a natural capital approach to construction.
09:40-10:40	<b>Workshop Session 1</b> <b>SELECT FROM WORKSHOPS A-D</b>
10:40-11:10	<b>Break and Exhibition</b> Grab some coffee & take the opportunity to network and explore the exhibition space with some fantastic exhibitors promoting products and services that are specifically tailored for the joinery industry.
11:10-12:10	<b>Workshop Session 2</b> <b>SELECT FROM WORKSHOPS E-H</b>
12:15-12:45	<b>The Future for Construction Products Manufacturing</b> <i>Peter Caplehorn, Construction Products Association</i> The UK's construction products manufacturing sector is well-placed to support Britain's future economic prosperity, but the sector is changing. This session embraces Digitalisation, the concept of Industry 4.0 and the impact of the Circular Economy and looks at the trends that will shape the future for UK manufacturers.
12:45-13:15	<b>The Future of Training</b> <i>Sarah Beale, Interim CEO CITB</i> The CITB has been supporting training in our sector since the Levy Order was first introduced in 1964. This year the Order is being reviewed and this keynote and subsequent debate looks at how a reformed CITB can better support woodworkers in the UK.
13:15-14:10	<b>Lunch and Exhibition</b> A chance to fuel up ahead of the afternoon session, plus another opportunity to explore the exhibition space.
14:10-15:10	<b>Workshop Session 3</b> <b>SELECT FROM WORKSHOPS I-L</b>
15:15-15:45	<b>The New Economy</b> <i>Alastair Stewart, Progressive Research</i> We live in unprecedented times and the complexity of the economy has perhaps never been appreciated more acutely. Leading economic commentator Alastair Stewart offers an at the economic outlook for construction in a post-Brexit Britain and how this is likely to impact upon the woodworking sector.
15:45	<b>Close</b>

## Your Business

Apprenticeships: Making it work
<i>John Henry, EDA Recruitment</i>
The apprentice landscape is set for an upheaval in qualifications, funding and payment with the Apprenticeship Levy becoming compulsory. This workshop looks at new support available to help you to engage and manage apprentices, your obligations, the funding you can draw down and how you can make the best of apprenticeships to support the future of your business.
<b>Workshop A: 9:40-10:40</b>

Joinery Health Check—Risk 101
<i>Jon Gorf, Joinery Industry Consultant</i>
As a woodworking company you are often asked to take more than your fair share of risk— from product design through to contractual management. This workshop is designed to give you a structured look at how to identify and manage your risks to ensure that you are ready for what the world throws at you on that damp Tuesday afternoon in February
<i>FEATURING ROOM 101 JOINERY CHALLENGE</i>
<b>Workshop E: 11:10-12:10</b>

A Focus on Growth
<i>Liz Male, Liz Male Consulting</i>
Being noticed is critical for any business looking for work—whether you rely on word of mouth, online impact or a more traditional marketing mix. We look at some best practice for joinery marketing, what you might need to back up your claims for your products — including the role of BIM — and when (and indeed, if) you should use social media to promote your business.
<b>Workshop I: 14:10-15:10</b>

## A Changing Market

Stepping up Stair Design
<i>Hannah Mansell, BWF</i>
Highlighting the differences in design, testing and liability between private and general access stairs, this presentation looks at how manufacturers can manage risk through proven design and calculation. It investigates some of the core challenges, common myths and opportunities impacting the staircase sector.
<b>Workshop B: 9:40-10:40</b>

Designing Windows for Excellence
<i>Kevin Underwood, Technical Director BWF</i>
Through research now available from the exciting Servowood project, BWF's work on Life Cycle Analysis and engagement in a range of technical support activities, BWF Technical Director Kevin Underwood revisits the principles of good window design, improving durability the failure process of timber windows and how good design and production can help ensure timber windows really do stand the test of time.
<b>Workshop F: 11:10-12:10</b>

Working on Major Contracts
<i>TBC</i>
The construction site is becoming an increasingly regulated environment and before we even get to walk through the gate there is pre-qualification, CDM responsibilities and general Health & Safety Awareness to be done. These are likely to impact more and more joiners. This session looks at top tips to winning work and managing your site teams.
<b>Workshop J: 14:10-15:10</b>

## A Safer Market

H&S: A Practical Approach
<i>Mark Stevens, Didac</i>
In the woodworking industry, workers are exposed to various dusts whilst completing daily tasks. Wood dust particularly can cause serious health problems; carpenters and joiners are four times more likely to suffer from asthma than other UK workers. Simply having the correct equipment isn't the end of the story. This session looks at best practice in a 21st Century workshop.
<b>Workshop C: 9:40-10:40</b>

The Changing Role of the Woodworker
<i>Laura Page, Pinsent Masons LLP</i>
An expert in the world of Health & Safety and Fire Safety, Laura Page looks at the concept of Duty Holder as it applies to H&S, product design, manufacture, installation and the concept of an "aggravated feature" in the supply of product. This presentation helps to quantify responsibilities and avoid serious problems down the line.
<b>Workshop G: 11:10-12:10</b>

Fire Doors: Maintaining Certification
<i>Hannah Mansell, BWF</i>
Minor changes can mean major swings in performance and these risks must be managed. Certification gives a framework, but it is not a get out of jail free card. This session looks at the process of certification, how it helps your business and how to work with it to ensure that the life-critical products you place on the market, will always meet the performance requirements.
<b>Workshop K: 14:10-15:10</b>

## A Look Ahead

Material Developments
<i>Dr Graham Ormondroyd, Bangor University</i>
Timber is very much the material of the 21st Century, but timeless does not mean standing still, the material continues to evolve and new treatments and modifications technology support strength, durability and performance. This presentation looks at how science is helping to secure a strong future for timber and extending the range of species we can use.
<b>Workshop D: 9.40-10.40</b>

Supplying the House Builder
<i>Darren Dancey, Crest Nicholson</i>
The housebuilding sector remains buoyant, but is also changing rapidly as the industry evolves to help hit Government targets. Crest Nicholson Technical Director Darren Dancey, takes us through the changing requirements for housing supply, the impact of off-site and how they are embracing digitalisation through BIM.
<b>Workshop H: 11:10-12:10</b>

An Eye on the Past
<i>TBC</i>
The plethora of conservation and heritage properties across the UK rely on our sector to support their maintenance and care programmes. This workshop looks at life through the eyes of a conservation officer — what are the priorities and opportunities for timber products and where do we need to be alert to competition?
<b>Workshop L: 14:10-15:10</b>

98% of people attending BWF Members' Day 2016 rated the day good or excellent

## Who's exhibiting?

Joining us on the day will be a number of specially invited exhibitors who will all be on hand to provide one-to-one support. These include sponsors Joinerysoft, Vetrotech, Qwood and W18.
