Entrance Doorsets

The TWA Scheme now also accredits entrance doorsets, which have to comply with the same rigorous technical criteria and auditing, set by the BWF and developed in conjunction with BSI.

The main aims for the entrance doorset section are:

- To define a standard for entrance doorsets which would ensure that they perform the task expected of them
- To offer a guarantee of the quality of production, supply, installation and use of TWA Scheme entrance doorsets
- Promote the benefits of factory assembled doorsets

By specifying, purchasing and using TWA Scheme windows & doorsets you can be confident that they will:

- Meet or exceed all relevant NHBC and British Standards
- Meet consumer needs and aspirations
- Provide you with the most sustainable choice

wood. for good. financially supports the TWA Scheme and is actively involved in its marketing:

wood. for good.

TWA Scheme timber windows and entrance doorsets

Nowadays wood products are more popular than ever. Wood is the most sustainable material. It is naturally renewable, carbon neutral, and can be recycled or used as a biomass fuel at the end of a product's life. Wood windows help reduce a building's carbon footprint because of their low embodied energy and because of wood's thermal efficiency.

TWA Scheme wood windows and entrance doors* have lower environmental impacts than other materials, and are rated A+ in the BRE Green Guide 2008 for domestic and commercial applications.* Like other wood-based products, they help achieve credits for Code for Sustainable Homes and BREEAM ratings.

* Rating is for the majority of TWAS Windows, which use water-based paints and stains. Those using solvent-based paints and stains are A rated in the BRE Green Guide 2008.

Peace of mind. Guaranteed

Specifiers and homeowners increasingly appreciate the combination of quality, looks and sustainability that only wood can offer. And when it comes to windows and doors, performance, maintenance and durability are issues where independent auditing and assurance are key. That's why we created the TWA Scheme, the most rigorous independently audited quality wood window scheme in the UK

About the TWA Scheme

The BWF developed the TWA (Timber Window Accreditation) Scheme to:

- Ensure timber windows and entrance doorsets provide excellent quality, performance and durability
- Provide rigorous and comprehensive third party testing of windows and doorsets
- Promote the advantages of fully factory-finished and double-glazed timber windows and factory-assembled doorsets
- Encourage good site practices when installing timber windows and doorsets.

Why choose a TWA Scheme window?

The most environmentally-friendly

TWA Scheme windows have an overall rating of A+ for commercial and domestic applications in the BRE Green Guide 2008.* More importantly, they score an A where other window materials score a D on climate change impact, the most significantly weighted assessment category.

Stringent criteria

TWA Scheme windows are manufactured to meet set criteria to raise the performance of window and door products, including a higher timber specification and a minimum factory finished coating.

BSI kitemarking

TWA Scheme members offer fully factory finished windows that are Kitemarked through our partner BSI Product Services. This involves independent auditing, rigorous regular factory assessments and annual product testing.

High performance

TWA Scheme Kitemarked windows are independently tested to ensure they exceed BS644, and meet or exceed BS 6375 Parts 1 and 2. They also meet or exceed NHBC guidelines and basic level BSI Kitemark requirements.

Energy efficiency

Energy efficiency is a key issue when specifying windows, and is measured by calculated U-values for each window or on a graded scale denoted by Window Energy Ratings (WERs) approved by the British Fenestration Ratings Council (BFRC). TWA Scheme fully factory finished windows come double- or triple-glazed for high energy-efficiency with U-values or WERs to meet or exceed current building regulations. Ask Scheme members for their energy-rating details or simulated U-values

Responsible purchasing - certified timber

TWA Scheme windows are made from independently certified timber from sustainable and legal forests as required by CPET, the Government's Central Point of Expertise on Timber and, with chain-of-custody certification, help achieve CSH and BREEAM 'responsible purchasing' credits.

35 year minimum service life

Timber is durable and simple to repair. With a well-managed maintenance regime, and any appropriate repairs, timber windows are able to last for the lifetime of a building. The BRE's Green Guide to Specification indicates a minimum service life of 35 years for TWA Scheme softwood windows.

Service life warranties

BSI Kitemarked TWA Scheme windows come with unbeatable warranties:

- 30 years on the preservation treatment of the timber
- 10 years on glazing, ironmongery and seals
- 8 years on the paint finish
- 5 years on the stain finish

Re-coating normally requires just a simple rubdown and application of a single coat of paint or stain.

Wide range of window styles

Wood is naturally the best material for good quality windows. Nothing else looks or feels right. TWA Scheme members make a huge range of fenestration styles, from contemporary 'tilt and turn', to the traditional vertical sliding sash.

Optional extras

TWA Scheme windows offer much more., You'll find enhanced security to Secured by Design requirements, acoustic windows, and fire resistant windows are all part of the range offered by Scheme members.

Research and development: BWF-BRE Showcase Project

Over recent years, there have been significant advances in the service life performance and durability of wood windows. TWA Scheme members have actively participated with BRE in monitoring the weathering of Scheme windows in order to advance the performance of wood windows beyond the levels of their competitors.

The Wood Window Alliance

In 2007 the BWF TWA Scheme members, along with wood for good, were the catalyst for the formation of the Wood Window Alliance, made up of some of the leading lights of the UK timber window industry. These companies, who are dedicated to quality assurance, have come together to create a powerful marketing campaign for quality wood windows in the UK and jointly raise standards in the timber window industry. All members of the TWA Scheme are also members of the Wood Window Alliance. Visit www.woodwindowalliance.com for more information.

Look for the TWA Scheme labels

Each label on TWA Scheme windows shows the manufacturer's logo, name and telephone number, a unique product reference number for traceability, and an assurance that the window is made from certified, sustainable and legal timber.

Fully factory-finished and glazed windows display the BSI Kitemark logo to show compliance with the BSI Kitemark scheme and all relevant service life warranties.

Any unglazed windows purchased under the Scheme do not show the BSI Kitemark logo, but some service life warranties may still apply.

Wood Window Alliance members may also carry a separate label.

Entrance Doorsets

The TWA Scheme also extends its accreditation scheme to entrance doorsets, which have to comply with the same rigorous technical criteria and auditing, set by the window element of the scheme and developed in conjunction with BSI.

The main aims for the entrance doorset scheme are:

- To define a quality performance standard for entrance doorsets ensuring that they perform the tasks expected of them
- To promote the benefits of factory assembled doorsets
- To offer a guarantee of the quality of production, supply, installation and use.
